

Fractions - Collecting Halves

This week we have been learning about halves. We know that $\frac{1}{2}$ is one of 2 same size pieces and that $\frac{2}{2}$ s make 1 whole.

Here is a choice of 2 activities to do at home. Please choose 1 activity.

1. We are collecting halves for the classroom.

Find as many halves as you can and make a list or take photos. $\frac{1}{2}$ way to school, $\frac{1}{2}$ way across the room. $\frac{1}{2}$ a box of eggs, $\frac{1}{2}$ an hour, $\frac{1}{2}$ the wheels on a car, $\frac{1}{2}$ a kilo of sugar, something that is $\frac{1}{2}$ full. How many halves can you find?

2. Decorate some biscuits, or a pizza. Put $\frac{1}{2}$ the toppings on each side. Take a photo!
